ECONNECT INSTALLATION AND ADMINISTRATION GUIDE 17 CHAPTER 2 ECONNECT ARCHITECTURE. The eConnect Outgoing Service periodically queries the eConnect_Out table. The service uses the record in the table to create an XML document that describes the new customer transaction.

eConnect Installation and Administration Guide

ECONNECT PROGRAMMER'S GUIDE 31 CHAPTER 4 ECONNECT XML DOCUMENTS. You can also use a CDATA tag to remove data from a field. To clear data from a field, create an eConnect XML document that updates the targeted record. Use a CDATA tag that contains a blank space to populate the eConnect element that represents the field.

eConnect Programmer's Guide - ApnaGP

Sending XML Files to eConnect I have been working on an eConnect integration that needs to import up to 40,000 sales transactions a day into Dynamics GP 9. The challenge is that the data is coming from an off-site eCommerce web site, so we had to export the data from the web site so that we could transfer the data for import to GP.

Dynamics GP Land: Sending XML Files to eConnect

Records the number and names of Manifest.xml files (in cases where the migration uses multiple manifests). DeploymentUserGroupMap Schema. Provides validation for the UserGroup.xml file exported into the content migration package. UserGroup.xml maintains a list of users and user security groups with respect to access security and permissions.

Content Migration XML Schema Reference | Microsoft Docs

In theory, eConnect Requester with the eConnect Outgoing Service can send certain XML documents to MSMQ, but that is a hassle to setup properly, and I don't know that all transaction types are supported by eConnect Requester--such RMAApplyType.
