elements were not created in the Big Bang but were produced by nucleosynthesis in giant stars and expelled across a series of supernovae explosions and new star formation from the supernovae remnants, which means heavier elements would accumulate over time. Another observation is that the furthest galaxies (earlier time) are often more fragmentary, interacting and unusually shaped than local galaxies (recent time), suggesting ...

First Principles of Cosmology - NASA/ADS

The general theory of relativity came out in 1915 and, almost immediately Einstein sought to explain the large-scale behaviour of the entire cosmos. 'First principles' discusses the role Einstein's theory has played in understanding the behaviour of the Universe as a whole. Einstein was hampered in his attempts by the lack of information.

...

On the First Principles is a theological treatise by the church father Origen. It was the first systematic exposition of Christian theology. Origen composed it as a young man between the years 220 and 230 while he was still living in Alexandria. Fragments from Books 3.1 and 4.1-3 of Origen's Greek original are preserved in Origen's Philokalia.

On the First Principles - Wikipedia

Principle of Constancy of the Speed of Light: Light always propagates through a vacuum at a definite velocity, which is independent of the state of motion of the emitting body. The first principle simply says that the laws of physics apply equally to everyone in all situations.
