However, unlike GIS, GeoComputation is still in its infancy and in these early days, several authors have taken the time to proffer their own view of what GeoComputation really is. For example, Mark Gahegan (1999), in a guest editorial of Transactions in GIS, emphasizes the enabling technology and defines four significant advances in computer science that have enabled GeoComputation: 1. 2. 3. 4.

## **GIS and GeoComputation: Innovations in GIS 7 by Peter ...**

GeoComputation was unleashed upon the world of geographical analysis in 1996 when Bob Abraham organised and ran the first International Conference on GeoComputation at the University of Leeds. The conference was a resounding success and has been repeated every year since: at the University of Otago, New Zealand in 1997, the University of Bristol in 1998 and Mary Washington College ...

GIS 7 by Peter Atkinson. Geographic Information Systems are computer-based systems for geographic analysis. They have been developed over the past twenty five years and are now widely used. A recent research direction has been the development of geocomputation , representing computer-based geographical analysis beyond the traditional bounds of GIS. In ...
