seven, eight, nine outcomes. And let's say that each of these outcomes are on a little piece of paper and they put it in a barrel and they roll it up.

Probability of a compound event (video) | Khan Academy

Calculating Volume. This page shows a set of three-dimensional solids that have their dimensions labeled, and the student's task is to compute the volume of each. They must also remember to write the units for their answer with the correct degree. However, if you don't want to burden them with that task, you can just stick with numeric values.
