Proteus Vulgaris Unknown Lab Report  
Unknown Lab Report Dr. Nathan  
Cahoone Microbiology 204 December 9,  
2010 Introduction There are many  
reasons for knowing the identity of  
microorganisms. The study and test was  
done by applying all of the methods that  
have been learned so far in the  
microbiology laboratory class for the  
identification of an unknown bacterium  
which I was using unknown #25.

Proteus (urease+, although one species  
can be variable). 5.02.2012 - As  
suspected the organism was VP(-) and  
urease(+), confirming Proteus as the  
genus. A tryptone broth to test for indole  
production and an Ornithine  
decarboxylase broth were both  
inoculated to differentiate between P.  
vulgaris and P. mirabilis.

therefore knowing the causes of the bacteria can help treat an ill patient. In microbiology laboratory class many techniques were studied to learn how a microorganism will react in certain conditions.

## **Microbiology Unknown Lab Report | E. coli | Unknown Report**

The results for Indole were positive, leading to the confirmation that the Gram Negative bacterium was either Escherichia coli or Proteus vulgaris. Next, a Urea test was completed because it also differentiated between the two confirmed possibilities. A negative Urea test resulted, which suggested that Escherichia coli was the unknown bacterium. However, wanting to confirm with a positive result, a Lactose test was conducted.
