Speed Ratings for Horse Racing

The Last CPR in column 15 in the race sheet header represents the Comprehensive Performance Rating (CPR) earned in the horse's last race. This provides a quick study of just who may hold the best current form. If there is a ~ following the CPR it indicates that this horse's last race was longer than 90 days ago.

Speed and Performance Figures - Today's Racing Digest

So if a race is given a class rating of 80, a horse that can run that speed ratings of 80 or better would have a great shot at winning the race. Look at a horse's recent speed ratings or an average of past ratings to compare against today's class rating. If the numbers aren't comparable you can feel confident eliminating that horse.

Speed & Class Ratings - TrackMaster

But as with all things racing, it is never quite that simple. Speed of course is related to distance. It is the time it took the horse to run the race divided by the distance that gives us the speed at which the horse travelled.

Create your own speed ratings - Daily Punt - Horse racing tips

The Daily Racing Form is the exclusive outlet for the Beyer Speed Figures, listing them in its past performances that also include running lines, a pace figure, some pertinent stats, info on turf and mud breeding, workouts, and a couple of sentences about the horses chances. DRF sells past performances via print and online, and electronically also offers Formulator past performances which offer more stats and the ability to customize your searches for data and stats.

Horse Racing Speed Figures Explained | America's Best Racing

We call our ratings the "SFR", which stands for "STATFREAKS RATING". The SFR horse racing ratings are measured in lengths, whilst in other codes e.g Formula 1, the SFR is measured in seconds. Our horse racing ratings are one of the most sophisticated measures available today.

Free Horse Racing Ratings - What's Included?

Apply the par figures to the horses you are evaluating. For example, Horse A in a \$20,000 claiming race runs 1 mile in one minute, 36 seconds on February 14 and the par for that classification is one minute, 37 seconds. The horse has run one second faster than par.

How to Calculate Speed Figures for Horse Races | SportsRec

* Rank each horse's last-race speed rating (using whatever figures you're most comfortable with) and add it to the total. If the speed rating is not ranked among the top three, it's worth four points.
* Using stats from this year and last, divide each horse's total earnings by its total starts and rank the quotients from highest to lowest.

About a year ago, I began experimenting with the concept of time decay as it relates to athletic performance. In fact, I wrote about my findings in an article entitled "A Speed Handicapping Method That Actually Works! In that article, I noted that speed figures — doesn't matter the type (the old Daily Racing Form ratings, Beyer numbers, the "Figs", etc.) — all suffer from the fact ...

Time-Adjusted Speed Rating Plays for ... - Horse Racing News

A quick check on the Racing Post website reveals that the horse had an RPR of 68. In other words, the Racing Post team believed the horse was overrated and issued a lower rating than the horse's OR. To give the Racing Post team credit, they are often correct which is why the publication is arguably the world's best horse racing authority.

Is a horse's official rating worth anything when betting ...

Speed Rating and Track Variant Daily Racing Form's Speed Rating and Track Variant provide an "old style" gauge of a horse's speed in a race. The Speed Rating is a comparison of a horse's final time with the best time at the distance at that track in the last three years.
